

Batch Stock Code Conversion

To provide a means for companies to successfully change their inventory stock codes without losing current transactions, historical data or jeopardizing data integrity.

The Value of the Stock Code Conversion Utility

- ▶ Change a single code or a batch using an import table
- ▶ Merge multiple inventory items together
- ▶ Optionally retain original stock code description
- ▶ Master file information and selling prices are converted
- ▶ Bills of Material are converted
- ▶ All historical data is converted
- ▶ All open orders are converted

Matching the Stock Code Conversion Utility to your business

- ▶ Easily change stock codes to match company growth requirements
- ▶ Retain all existing and historical data against each item
- ▶ Merge items where duplications occur
- ▶ ECC controlled items are excluded
- ▶ Validates that merged codes have same unit of measure
- ▶ Control access to conversion utility via SYSPRO security

Integration

- ▶ Available from SYSPRO Issue 008 to current versions

Audit Trails and Reporting

- ▶ Produces audit trail of changes
