

The Competitive Edge Since 1986.

FOR IMMEDIATE RELEASE

RTE Launches riteSCAN Mobile Warehouse for SYSPRO™

New software product brings affordable high speed barcode scanning and real-time data processing to SYSPRO ERP.

St. Cloud, MN — March 21st 2007 — RT Enterprises (RTE), an award winning business solutions provider, today announced the launch of riteSCAN Mobile Warehouse for SYSPRO™, the warehouse management component of its riteNOW™ suite of real-time mobile solutions for SYSPRO ERP.

According to industry analysts, effective supply chain management is a critical element for every organization in today's competitive market, and technologies that replace paper-based processes are the cornerstone. Scanning product codes instead of manual data entry, having instant access to real-time data right on the operation floor, and tracking inventory movements as they happen can provide a true competitive edge.

RTE's riteSCAN Mobile Warehouse for SYSPRO™ provides SYSPRO ERP customers with real-time transaction processing utilizing wireless handheld devices equipped with barcode scanners. Now it's possible for workers to scan products at various stages on the factory floor and send the data directly into SYSPRO ERP to provide management with a real-time view of work in process. Some other tangible benefits include reducing shipping errors, improving the accuracy of inventory counts, reduction of physical inventory, and increasing overall employee productivity.

Notes Bruce Hagberg, president of RTE, "Product barcodes have been a part of everyday life for decades. The real revolution today is in the affordability of mobile computing and wireless connectivity to back office systems like SYSPRO ERP. Combine this technology with easy to use, affordable software like riteSCAN Mobile Warehouse for SYSPRO™, and sophisticated automated warehouse management is well within reach of small and medium-sized businesses."

"We've looked at several barcode solutions and found there is definitely a need for a robust solution that integrates tightly with SYSPRO," says Hagberg. "With riteSCAN, we put the emphasis on building a reliable system that is easy to learn and use, works with a wide range of hardware solutions, and brings a quick return on investment for small to medium-sized partners."

Future components of the riteNOW™ suite include riteTIME™ labor collection with time & attendance and riteVIEW™ real-time executive reporting for mobile computers, PDAs and smart phones.

Founded in 1986, RT Enterprises is an award winning business solutions partner. The company offers a wide range of products and services designed to give their customers a competitive edge.
